Section 3: Filming Safety Measures

- All crew and participants are required to complete a COVID self certification form as well as pass a temperature screening before shoot participation.
- Necessary day-of documentation is to be distributed digitally beforehand.
- All crew members have experience working in industrial and high risk environments.
- Onset equipment is cleaned and disinfected before and after each use.
- All crew members operate under the direction of the site safety officer and in accordance with any site safety plan.
- Participants must sanitize or wash hands frequently.
- Crew members must wear gloves whenever they assist any individual with a body mic. Used gloves must be discarded after each use.
- Crew members are to block off a designated area for drone operations whenever necessary.
